

Compact magnifier

The Compact is a pocket-size lightweight video magnifier, for those who require a larger viewing area than a traditional hand-held magnifier. Whether around the house, at work, or out and about shopping, the Compact is ideal to assist with everyday reading and writing activities.

Choice of high contrast viewing modes makes reading much easier.

Can choose between full colour, black text on a white background, or white text on a black background. Or semicolour combinations of blue and yellow, and black and yellow.

Flicker-free and anti-glare screen.

Supplier	Optelec
Manufacturer	
Product Code	N/A
