

Mobile phone magnifier

Mobile Magnifier is the first screen magnification software for mobile phones for the visually impaired. It enlarges and enhances all items of the mobile phone display, automatically detecting and magnifying the area of interest as the user navigates through the phone's user interface.

Product Highlights

Magnifies the screen up to 6 times Optional Border to easily identify the magnification window, (size and colour selectable)

User selectable colour schemes including:

- Black and White
- Grey Low Resolution
- Grey High Resolution
- Color Low Resolution
- Color High Resolution
- Inverted colour

Easy to use; no training necessary. Several Hot Keys provide access to the most common features of the Magnifier.

Price £90 including installation on your phone.

You should send your phone by recorded delivery for security and also so you can track the delivery.

£5.00 charge for the return packing and recorded delivery.
